

Accessing ISA's Compendium Project and Intelligence Studies Section Contributions

As of 24 April 2010, full text access to many evaluations of the Intelligence Studies and International Security Studies literatures has been provided free to all ISA members.

Published as International Studies Encyclopedia, the end product is an extensive set of evaluative literature reviews...assessments of the sufficiency of the existing literature on different subjects. These reviews also highlight areas of research that still need coverage; essentially, implicit research agendas for enterprising graduate students/scholars to fill in and get published to grow the body of knowledge in the field...

ISA's Intelligence Studies Section identified 20 sub-topics within the field, and lined up authors to write peer-reviewed evaluations of the sufficiency of the literature on those topics. The published intelligence-related essays are listed below, with another 3 essays in progress for eventual publication in the online version, and 6 essays still available for authors to contribute...

All essays are available free to ISA members through a one-year trial access to the online version of ISA's International Studies Encyclopedia. To access them:

- (1) Login to MyISA at <http://isanet.ccit.arizona.edu/myisa/> with your username and password
- (2) Click on eJournal Access from the Quick Links menu on the right
- (3) Click on the International Studies Compendium Project image.
- (4) Search for "intelligence" and you will be able to pull up the full text of the essays below, or search for whatever other topics might be of interest...

See additional International Security Studies Section topics also listed below, for a sense of the topics covered and expertise of contributing authors.

If you have knowledge of the literature and would be interested in contributing to continued growth of the Encyclopedia, topics still available include: (a) Espionage; (b) Intelligence Ethics; (c) Intelligence Sources and Methods; (d) A Comparative View of Intelligence; (e) Intelligence Processes (ie. Intell Cycle); (f) The Study of Intelligence.

See below for intelligence and security studies table of contents. If you would like to volunteer to be an author or have any questions about the Project, please send questions to: spm8p@yahoo.com

Regards,

Stephen Marrin & Larry Lamanna
